

Consumer Behavior Analysis

Capstone Project – Modern Visual Edition

A leading retail company seeks to decode customer shopping patterns across demographics, product categories, and channels to uncover what drives purchasing decisions, repeat purchases, and long-term customer loyalty.

Business Question:

How can the company leverage consumer shopping data to identify trends, improve customer engagement, and optimize marketing and product strategies?

Project Deliverables

- Data Preparation & Modeling – Python for cleaning and transforming raw data.
- Data Analysis – SQL for transaction simulation, segmentation, and loyalty insights.
- Visualization & Insights – Power BI interactive dashboards and KPI tracking.
- Report & Presentation – Stakeholder-ready findings and recommendations.
- GitHub Repository – Organized source code, SQL scripts, and dashboard assets.

Key Factors Under Investigation

- ✓ Discounts & Promotional Impact
- ✓ Customer Reviews & Ratings
- ✓ Seasonal Purchasing Patterns
- ✓ Payment Preferences
- ✓ Online vs Offline Channel Behavior
- ✓ Demographic Segmentation

Tools & Technologies

Python | SQL | Power BI | GitHub
